ANDOVER, Mass., April 8 /PRNewswire/ -- Sentillion, Inc., the leading provider of single sign-on access solutions for healthcare, today announced that C. Martin Harris, M.D., M.B.A. will join its Board of Directors. Dr. Harris currently serves as the CIO and chairman of the Information Technology division of The Cleveland Clinic Foundation in Cleveland, Ohio.

"We are honored to have Dr. Harris join Sentillion's board of directors. Dr. Harris' credibility and leadership in the healthcare industry enable him to bring an invaluable perspective to the Sentillion team," said Robert Seliger, president and CEO of Sentillion. "Dr. Harris' dedication to the combined fields of healthcare and information technology will be a formidable asset for Sentillion to leverage as we continue to grow our ability to meet the diverse needs of caregivers. We look forward to Dr. Harris' vision and guidance on critical business issues as Sentillion moves into its next phase of growth and development."

"As a practicing physician and active CIO I intimately understand the challenges faced by caregivers in today's healthcare environment. Providers require technologies that enhance care delivery process and improve access to patient information, while addressing privacy needs. Sentillion's products and business model are focused on meeting these needs," said Dr. Harris. "It is with pleasure that I join the Sentillion board of directors. I look forward to taking an active role as the company continues to build its leadership position in healthcare IT."

In addition to his role as CIO at the Cleveland Clinic, Dr. Harris chairs the National Health Information Infrastructure (NHII) Task Force of HIMSS, one of the largest information and management systems societies in the world. He also chairs of the Foundation Board for the national e-Health initiative, a public policy and advocacy group encouraging interoperability of healthcare information technology. He received his undergraduate and medical degrees from the University of Pennsylvania. He also holds a MBA from The Wharton School at the University of Pennsylvania.

About Sentillion

Sentillion has one focus: delivering technology that allows users simplified, intuitive and consistent access to all healthcare applications in a secure manner. Recently named the leader in single sign-on for healthcare by IDC Research, Sentillion's Vergence(R) product suite enables single sign-on access to healthcare systems, strong authentication, single patient selection across multiple applications, and centralized privacy management. Sentillion's products are used by leading innovative healthcare organizations across the nation including federal healthcare institutions, academic healthcare institutions, integrated delivery networks, community hospitals, and clinics. Sentillion is a privately held company headquartered in Andover, Mass. For more information visit Sentillion at http://www.sentillion.com/.
